## DizzleNation Records Announces the Launch of MIXofDIZ

New Singles, Forthcoming Debut Album, and a Forward-Thinking Creative Process

Embracing Modern Music Creation at the Intersection of Innovation and Artistry

**Sydney, Australia.** The music industry is at a turning point, as AI tools and technologies reshape what's possible in songwriting and production. At **DizzleNation Records**, we embrace this evolution by collaborating with artists to push creative boundaries, spark innovation, and bring projects like **MIXofDIZ** to life.

## Introducing MIXofDIZ

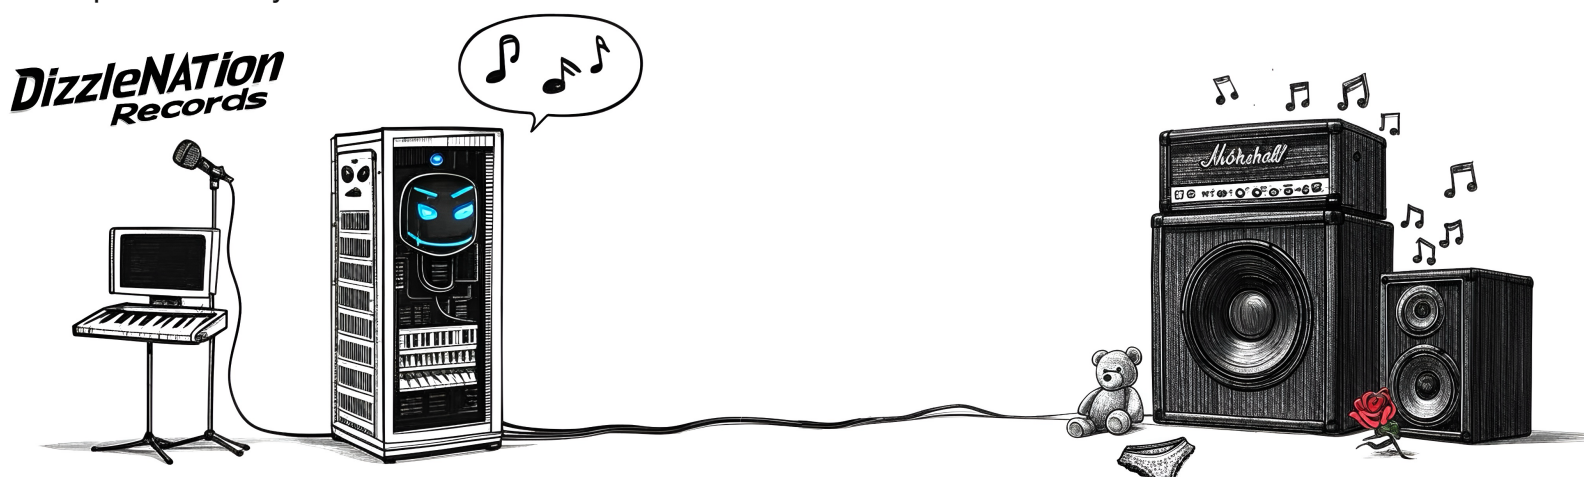

**DNR** proudly introduces **MIXofDIZ**, a bold new artist and musical experiment blending punk, pop, cinematic rock, and theatrical and experimental soundscapes. Early singles like “**Stand Tall: Echoes Beyond the Fall (Part One)**” are already making waves with music fans eagerly anticipating new singles (at least 3 music fans), MIXofDIZ is gearing up for an exciting debut album.

MIXofDIZ is more than an artist; it is a collection of evolving musical personas. Each track explores a theme-appropriate genre or style, ensuring that no two songs are alike. Familiar voices return as MIXofDIZ's generated personas, creating a thread of continuity for listeners. Like a traveling puppet show, where voices and faces reappear as digital collaborators or guest performers. Audiences will have to follow along to meet the whole gang as it evolves.

## A Forthcoming Debut to Watch

The **MoD** debut album promises to showcase the humor, emotion, and boundary-pushing creativity that define MIXofDIZ. With a dynamic range of tracks, the album will explore themes of resilience, storytelling, and bold artistic and satiric expression, brought to life through both traditional production techniques and cutting-edge AI tools.

DizzleNation Records is proud to champion MIXofDIZ as a project that not only creates unforgettable music but also importantly invites listeners, industry experts and the media behind the scenes to see the creative process in action. This blend of collaboration, education, and innovation sets MIXofDIZ apart as a truly one to watch in the modern music scene.

# MIXofDIZ at DizzleNation Records

## Key Highlights

- **Launch:** MIXofDIZ kicks off with singles like “**Stand Tall: Echoes Beyond the Fall (Part One) - Radio Edit.**” And the soon to be release “**PROMOTION\_add\_me\_coward.exe**”
- **Personas:** Each song features different styles and voices, creating a distinct yet cohesive musical journey through recurring “digital collaborators.” As MIXofDIZ personas provide continuity.
- **Debut Album (2025):** Currently in development, the album promises a genre-defying experience blending humor, emotion, and cutting-edge production into an immersive experience.
- **Target Audience:** Fans of inventive storytelling, dynamic production styles, and creative experimentation. Industry professionals and tech enthusiasts will also appreciate the use and exploration of AI-driven tools.
- **Fearless Songwriting:** MIXofDIZ embraces the oddly specific, turning real-life inspirations into unique tracks that stand apart from generic mainstream themes. If you're trip to Antarctica is cancelled, there's a song for that. Got an Irish Wolfhound and a Black Pug? Then “**Tall & Small**” is the MIXofDIZ song for you. Did a tall colleague dress up as the easter bunny and Santa this year? Then MoD has “**Stand Tall: Echoes Beyond the Fall (Part One)**”, Radio and Album edits with “**The ballad and death of Giant Lloyd (Part Three)**” cued up and ready to rock!

## The Creative Process: How AI Tools Are Integrated into the Process

### 1. Song Inspiration

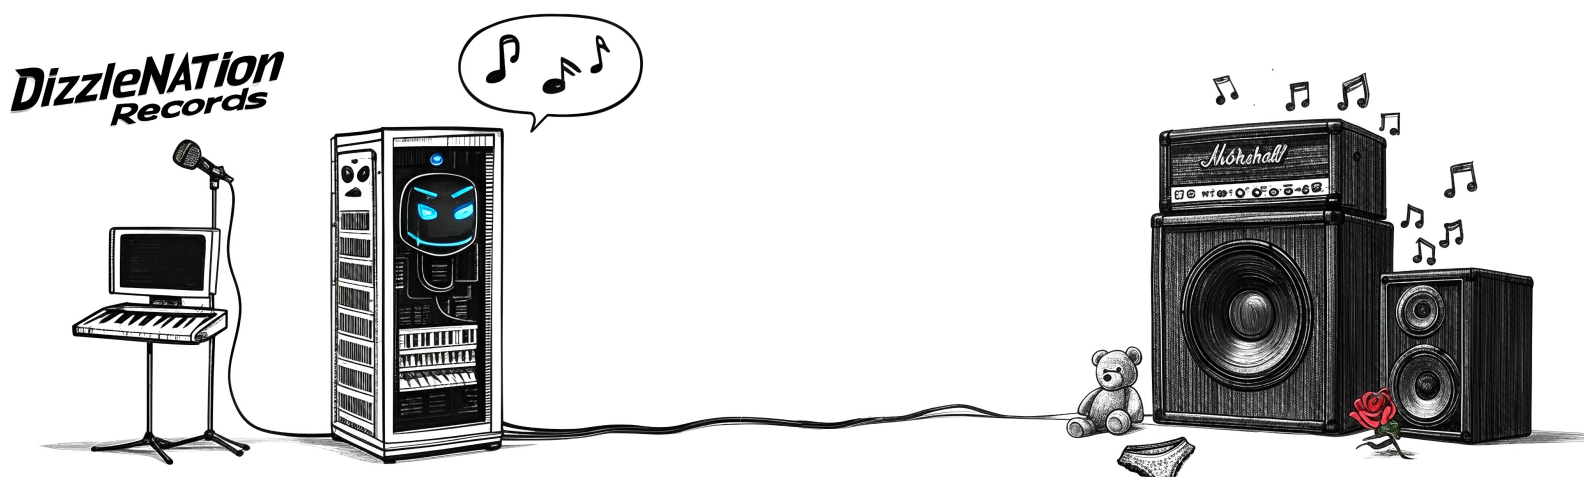

- Ideas and themes originate the traditional way: pen, paper, and human creativity. AI does not shape the initial concept.

### 2. Refining Lyrics & Concepts

- Once a raw idea is formed, MIXofDIZ collaborates with ChatGPT to refine lyrics, syllable structure, and potential genre adaptations.

### 3. Generating Music & Vocals

- Suno is used to create complete musical versions and initial melodies, vocal lines, and to refine them further (including remasters, alternate vocalizations, and stem splits).

# MIXofDIZ at DizzleNation Records

## 4. Production & Mixing

- All stems and vocal variations are imported into Logic Pro (iPad and Logic Pro X) for mixing and mastering.
- Integrated Logic AI tools handle additional stem splitting, while various AI MIDI plugins assist in turning MIDI sections into vocal melodies. Software Instruments and External services and plug-ins eg: Fadr can produce additional stems for the edit and mix.

## 5. Voice Generation & Sound Effects

- ElevenLabs Studio generates additional voices and sound effects, processed in Logic to craft MIXofDIZ's array of personas, alongside recorded human vocals.

## 6. Mastering & Final Assembly

- Once all layers are in place, a final master is produced and prepped for distribution.

## 7. Visual & Promotional Elements

- DALL·E and Grok generate cover art and promotional imagery.
- Sora provides AI-driven video clips, later edited in Final Cut Pro.
- ChatGPT also assists in producing written materials, summaries, and track descriptions.
- AI algorithmic tools enhance social media targeting alongside traditional marketing efforts.

## Initial Single Releases

### 1. No Snow, Don't Go: (Released Dec 1, 2024)

This anthem of frustration was inspired when MIXofDIZ's Antarctic vacation was canceled 20 minutes before departure. Armed with thermal underwear and nowhere to go, they transformed disappointment into creativity, sparking this musical journey. Instead of enjoying the traditional airport Big Mac, MIXofDIZ couchbound as the the phone buzzed "your flight is on time, proceed to gate fourteen" began to ponder, Can AI tools facilitate a complete path to musical expression? Only one way to find out.

### 2. Tall & Small: Released Dec 8, 2024)

A quirky exploration of Dogs, inspired by an Irish Wolfhound named Jed and his little brother a small black pug called Josh. This track was a key step in refining the MIXofDIZ workflow, blending traditional and AI-generated components into a cohesive sound.

# MIXofDIZ at DizzleNation Records

### 3. **Paws and Claws:** *Released Dec 8, 2024*)

A soulful and high-energy tribute to Prince, inspired by his, jam-session style classics “Get-Off” and “Jughead”. This track was another step in mastering the balance between traditional and AI-driven music creation and follows the Prince formula, risqué topic, soul & groove and second half jam that always fades cause the jams don’t stop they last forever.

### 4. **Pick Up Your Shit, Peter:** *Released Dec 8, 2024*)

Oh, this one, Is for mum because dad leaves his crap everywhere!

### 5. **Stand Tall: Echoes Beyond the Fall (Part One) - Radio Edit:** *(Released Dec 15, 2024)*

A punk-emo-rock-opera anthem with dynamic vocals with emotional storytelling. Stand Tall: radio edit and album version, represent the culmination of MIXofDIZ’s workflow tests and announces the project’s arrival to the world. Nostalgically over-compressed an authentic tribute to the genre. The Giants theme is explored in the Album Versions theatrical elements and reprised by the first digital persona in “The ballad and death of Giant Lloyd (Part Three)” *(Released Dec 15, 2024)*

### 6. **PROMOTION\_add\_me\_coward.exe** *(Releasing Jan 2025):*

A chaotic, bold track blending robotic electro-pop and cinematic storytelling about PROMO!

## Debut Album (Scheduled 2025): Track-list In Progress
