AGL kerbside chargers now available on Chargefox

In another win for EV charging convenience, AGL electric vehicle (EV) charging sites will now be available to drivers through the Chargefox app.

Located in Sydney these pole-mounted kerbside chargers, provide convenient charging for residents without home charging or those visiting the area for shopping, entertainment, or running errands.

"We are excited to welcome another charging network to Chargefox. Kerbside charging is a critical part of our mission to provide convenient charging to EV drivers right across Australia, with a secure and convenient experience." said Executive General Manager of Chargefox Ed Asuncion.

The announcement means AGL's kerbside charging sites, which come in two charging speeds (up to 7kW and up to 22kW), are now accessible through the Chargefox app and Chargefox RFID cards. Chargefox users will be able to locate, charge and pay for charging sessions at these locations, seamlessly integrating AGL's convenient kerbside infrastructure with Australia's most popular EV charging platform.

AGL's Head of E-Mobility Mabelle Reyes said "At AGL, we're really focussed on making it easier for Australians to adopt electric vehicles but recognise that not everyone will have the ability or ease of access to have at home chargers. By providing over 150 public chargers around Sydney our central aim was to improve this access to reliable charging. Partnering with Chargefox now extends the reach of these kerbside chargers, giving more EV drivers the confidence that they can conveniently charge in more locations without reliance on off-street parking."

Making chargers available on Chargefox, means exposing them to over 300,000 EV drivers. More exposure means more people using chargers, which means more

revenue for charger owners, who will ultimately invest in more chargers. This is a win-win for drivers and charger owners alike.

Rebecca Stenhouse, CEO of Australian Motoring Services (AMS) who operate Chargefox said "We're building a future where all public EV chargers are available to all EV drivers on one simple platform, so users can easily and securely see, navigate to, and use thousands of chargers without having to use multiple apps."

The newly integrated AGL sites are now available on the Chargefox app.

About Chargefox

Chargefox is the leading provider of charger & electric vehicle software & management solutions and provides the Chargefox app which offers thousands of EV chargers in a single user experience.

Since 2017 Chargefox has been improving EV charging for drivers, organisations and governments through innovative technology and software.

Chargefox is wholly owned by the Australian Motoring Services group (AMS), owned by Australia's Mobility Clubs (NRMA, RACV, RACQ, RAA, RAC, RACT).
