

Codekids Announces New Children Coding Classes at Perth Modern School

FOR IMMEDIATE RELEASE

Codekids Perth, has released a brand-new location to hold coding classes available to school-aged children in Perth, WA. Classes which aim to maximise future career opportunities for our younger generations, creating more young entrepreneurs and an exciting future. Codekids are expanding across Perth to multiple locations, giving students from different areas the opportunity to take part in something amazing!

Codekids was established in July 2020 by a team of young entrepreneurs in Perth. They decided to share their passion for coding by teaching students the skills and knowledge they need to prepare for a rapidly changing future. The Codekids team are driven in what they do and believe computer programming/coding could be the future language of English.

A McKinsey Global Institute report suggests that by 2030, AI and robots could replace as much as 30 percent of the world's current human labour. We see these figures in Australia already with about one-third of the mine haul truck fleet at Rio Tinto's Pilbara mines being automated... "To embrace this change, Codekids believe it is crucial to start learning coding and programming as young as Year 1." Said by Codekids Co-founder, Alex Shi.

"Plenty of students have little or no interest in arts and creativity but find themselves using coding to create interesting and expressive games and stories while also improving their STEM skills. On the other hand, many artistically minded students find themselves improving a lot of STEM skills such as technology and maths, skills that they may find uninteresting or difficult in school." Said by Codekids Co-founder, Nick Berryman.

Codekids offer high-quality and children-friendly coding classes for school-aged students. Students learn important skills such as problem-solving, critical thinking, creativity and much more all while having fun!

Codekids Perth launches children coding classes at Perth Modern School starting in Term 3, 2021.
