

Media Release
For Immediate Distribution

The Electric Mobility Manufacturers of Australia (EMMA) was established to represent the interests of manufacturers who are seeking to embrace the future of electric technology and make Australia a leading manufacturer in this space. We are committed to working in partnership with Federal, State and Territory Governments to change the way that electric vehicle manufacturing currently operates.

Here at EMMA we are all about supporting and advocating for electric vehicle manufactures in Australia. We are known as the lucky country for a reason – we have the opportunity and the ability to affect change. The electric vehicle industry has the potential to create hundreds of new jobs, improve air quality and our levels of national fitness. Furthermore, the savings alone on fuel reduction alone will open up a whole new world of possibilities for our children.

EMMA brings together the best & brightest Australian innovators to drive the future of Australia's EV Landscape.
