

'Media Release'  
27th February 2023

# **The World's First Anti-Viral, Anti-Bacterial SCRUBS. The only ARTG (TGA) approved scrubs product in Australia. Made from recycled plastic bottles.**

## **FOR IMMEDIATE RELEASE**

Sydney, Australia - 27th February 2023 - KANGARAMA, changing the world in medical scrubs

Kangarama is an Australian based material science company developing medical apparel that are anti-viral, anti-bacterial & anti-microbial in the medical sector. '**Kangarama Scrubs**' is entered in the ARTG, (ARTG 349484)'. <https://www.tga.gov.au/resources/sponsor/kangarama-pty-ltd>. Kangarama scrubs inhibit the growth of viruses & bacteria making Kangarama one of a kind. The scrubs have been tested up to 100 washes and are also still effective upto to 99.9% of viruses and bacteria.

Furthermore Kangarama scrubs have been taking the world by storm and have partnered with big brands like "The Wiggles". Therefore, Kangarama can create wiggles-themed scrubs perfect for children's wards and clinics.

Kangarama scrubs also have social responsibility at the forefront of all their decisions. As a result, Kangarama "Arma Tech Fabric" **is made from recycled water bottles**. The scrubs are manufactured in Fiji and we give a percentage of sales to support **Fijian** villages. To further Kangarama's sustainable and ethical decisions, Kangarama is submitting a modern slavery statement to the Australian Government. This public document keeps us accountable to be ethically moral.

Kangarama scientifically is extraordinary. The scrubs are lightweight, breathable, have four-way stretch, anti-wrinkle and anti-static. The dye used to create the scrubs are also OKEO TEX-certified which are water-based and non-toxic, ensuring they are not harmful or cause irritation to the skin.

Kangarama is all about MAKING THE CHANGE.
