

## THE EASY CLEAN BOTTLE™

SYDNEY - Blem Beach Accessories, an Australian company that specialises in eco-friendly products, has launched a new range of water bottles that are designed for easy cleaning. Made from premium materials and featuring a unique detachable design, the new Blem water bottles are perfect for anyone who wants to stay hydrated without the hassle of mouldy bottles or hard-to-reach corners.

The Easy Clean Bottle™ comes in a range of colours and sizes (1.1L coming soon), and is made from high-quality BPA-free stainless steel. They feature a detachable bottom section that makes cleaning quick and easy, while the wide mouth and leak-proof design make them convenient for everyday use.

"We know that one of the biggest challenges of using reusable water bottles is keeping them clean," said the founder of Blem. "That's why we've developed a range of bottles that are not only stylish and practical, but also easy to clean. With our detachable design, you can get to every nook and cranny and ensure that your water bottle stays fresh and hygienic."

The Easy Clean Bottles™ are available now at [blem.com.au](https://blem.com.au), where customers can choose from a range of colours and personalisation features. With their easy-to-clean design and eco-friendly message, these bottles are set to become a must-have accessory for anyone who wants to stay hydrated and reduce their environmental impact.
