

Unprecedented Response to MyTeacherAide Pilot Program Signals a Clear Demand for AI-Powered Teaching Tools

FOR IMMEDIATE RELEASE

Hobart, Australia - Tuesday 18th July, 2023

Just days after announcing the pilot program for MyTeacherAide, an innovative AI-powered tool for teachers, we're overwhelmed by the incredible response we've received. Over 200 teachers have already applied to participate in the program, proving the growing necessity of AI-powered technology in the realm of education.

The strain on teachers is evident with 75% of Australian teachers feeling stressed, 82% struggling with work-life balance, and a staggering 84% that have considered leaving the profession in the last year alone. But this isn't just an Australian phenomenon: there are teacher shortages in every continent.

Paul Matthews, Co-Founder and CEO, attributes the early success of the pilot program to the keen understanding of teachers' needs: "As a teacher myself, I understand the stress that comes with the profession. AI presents a real hope for stressed out teachers. We built MyTeacherAide to tackle the root of educators' issues head-on, and the overwhelming response we've received is a clear indication that our solution is not just wanted but profoundly needed."

MyTeacherAide is an AI-powered teaching assistant that assists teachers with lesson planning, curriculum alignment, resource generation, report writing, text generation and email handling. Tasks that require hours can now be done at the click of a button with simple input from teachers. This frees them to spend more time doing the very thing they entered the profession to do - nurturing young minds and inspiring the next generation.

The pilot program's popularity extends beyond numbers. Teachers joining the program are excited about the prospect of a tool that can drastically reduce their administrative workload and improve their work-life balance. One principal expressed his anticipation, saying, "I'm sold. The thought of giving my staff the ability to regain control over their work-life balance is like a breath of fresh air."

The team at MyTeacherAide is already inspired by the enthusiasm seen so far. We invite more educators to apply for our Pilot Program commencing in September, and experience firsthand the difference that MyTeacherAide can make.
