

# Hire Express leverages Inauro to enable real-time data workflows in Baseplan

**Hire Express uses Inauro's Perspio™ platform to rationalise equipment telemetry and automate the data exchange with Baseplan.**

Sydney, November 1st, 2021

Hire Express, the current Australian Hire Company of the year winner, and Inauro announce the successful deployment of the Perspio™ platform in the Hire Express operation.

Perspio™ provides the Hire Express team with a single pane of glass view of its fleet, already equipped with various telematics solutions, both OEM provided and added-on. Rental and servicing information from the Hire Express ERP, Baseplan, is also provided making the management of the fleet a lot simpler for Hire Express. "Being able to access all of the relevant data of each of our assets in one system is really making a difference for us" says Allen Besseling, Hire Express Managing Director. "For a relatively agile operation, we can't afford to waste time reconciling data between systems, or in administrative overheads - our roll-out of Perspio™ is really making this pain go away".

Perspio™ is also writing data to Baseplan to make it more real-time. Plant engine hours and odometer readings, for example, are

being updated in Baseplan from Perspio™ facilitating the field servicing aspects of the Hire Express rental operation. Tolls are another aspect of the integration, with charges being directly written into the Baseplan contracts, avoiding costly administrative headaches at the end of the month. "The rich operational data being fed in real time by Perspio™ into the Baseplan enterprise software is further enhancing efficiencies for our rental company customers" says Joe Westhuizen, CEO at Baseplan "we're delighted to continue to develop this integration which truly makes a difference for our customers".

Craig Kesby, Co-CEO of Inauro says: "It is great to see the initial results of this deployment coming to fruition for Hire Express - we're excited to accompany Allen and the team to create further automations in their workflows."

### **About [Hire Express](#)**

Hire Express is a general equipment hire company operating through a centralised distribution warehouse in Blacktown, NSW, supplying an extensive range of the latest equipment ranging from small building tools to large construction equipment.

### **About [Baseplan](#)**

Baseplan Software provides equipment and rental management software, in a fully integrated ERP solution, designed specifically to meet the needs of the industry. Baseplan offers a system that is scalable, tightly integrated and module based to offer a customised solution, appropriate to the requirements of your business. From mobile solutions to rental management, Baseplan can offer business intelligence software designed to keep their clients a step ahead of their competition.

### **About [Inauro](#)**
