

## ***Realtime AR introduces Moziware's Cimō technology to their range.***

**Cimō** brings you the newest in voice-activated, hands-free, remote collaboration and data capture technology with the world's first pocket-sized wearable computer, extending the reach and capabilities of your workforce and turning any user with a Cimō headset into a virtual expert.

Realtime AR, APac leaders in wearable technology and augmented reality solutions and training, are new distributors of the Moziware device. With a lightweight and compact design, Cimō fits comfortably in your pocket. Dustproof and IP66 water-resistant, Cimō empowers teams to connect in every environment with the highest comfort ratings and an extended battery keeping you effortlessly connected without downtime. Made for several Industries including Manufacturing, energy and oil, Medical/emergency services, transport, mining and more.

Realtime AR works to integrate this technology into your organisation and to connect seamlessly with your enterprise systems, over 200 apps, and third-party IoT devices. Teams can collaborate in real-time to make faster and more informed decisions, resulting in increased productivity, improved safety, optimized workflows, and lower costs.

Contact Realtime AR today for a free demonstration of the Cimō device and learn about our services.
