For Immediate Release

Brendan Wong Joins Ninja Syndicate as an Advisor

Perth, 20 October 2022 - Brendan Wong, Co-Founder & Chief-Contributor of one of the largest Web3 gaming guilds in the blockchain space joins Ninja Syndicate as Strategic Advisor.

Brendan brings to [Ninja Syndicate](#) fifteen years of expertise in entrepreneurship, growth and scaling for start-ups, including experience in fundraising and networking. He has a core focus on building robust partnerships and delivering multimillion-dollar bottom-line growth. Most recently, Brendan built [Avocado DAO](#), one of the largest Web3 gaming guilds in the blockchain space and developed revenue run rate from zero to \$20M in the first year of its business operation.

Brendan is excited by what Ninja Syndicate has already achieved with its initial game, Supremacy, and is honored to join the team.

“The Ninja Syndicate team have demonstrated they are extremely capable of delivering an innovative approach to Web3 gaming. They are going against the grain of the current Web3 GameFi Space which, in many aspects, currently lacks variety in gameplay and tokenomics design. I am excited by the prospect of what they [Ninja Syndicate] are building. I can’t wait to see their full vision come to life and it’s truly an honour to come on board as an advisor to support their development in building a strong Web3 game environment,” said Brendan.

Ninja Syndicate CEO, Alex Dunmow, mirrors this sentiment: *“This is a really exciting time for the Ninja team as we gear up for rapid expansion with the release of new features for the Supremacy Battle Arena and its wider metaverse. Having Brendan come on board as an Advisor at this important stage in the company’s growth is perfectly timed.”*

Ninja Syndicate is positioning itself as a leading gaming studio in the Web3 space. The team has already launched Supremacy, a fully playable AI Driven Mass-Multiplayer Online Battle Arena. Players can join the multi-task economy and be rewarded with SUPS, the in-game currency, by competing and winning in a 24/7 continual battle stream.

The gaming studio recently partnered with Immutable X, the world's first Layer 2 Rapid Scaling solution for Ethereum. The support and ecosystem of Immutable X will serve as a foundation for major upcoming expansions to Ninja Syndicate's gaming metaverse. Brendan's advisory role begins as the studio prepares for these major vertical additions to the interoperable blockchain game, from the Battle Arena to the FPS and the upcoming Supremacy World.

About Ninja Syndicate

Ninja Syndicate is a leading GameFi studio based in Perth, Western Australia. In February 2022, the studio launched Supremacy, its AI-themed Mass-Multiplayer Online Battle Arena game.

Ninja Syndicate is currently building an immersive economic simulation game, Supremacy: Grand Strategy, which allows players to collaborate in a futuristic open-world metaverse environment.

About Avocado DAO

Avocado DAO is a Web3 gaming guild that provides rewarding experiences for its scholars and facilitates entry to GameFi to empower more users. Their goal is to reduce user friction, encourage interoperability and support Web3 adoption through the education of our growing community via GameFi, SocialFi and DeFi.
