

Media Release - Romotow - November 2023

We are proud to share that TIME magazine has selected the New Zealand designed and built Romotow T8 on its list of the Best Inventions of 2023.

Last week, TIME revealed its annual list of the Best Inventions, which features 200 extraordinary innovations changing our lives. The ROMOTOW T8 was included in this list in the design category and chosen for its outstanding and original design and functionality.

Romotow is the next evolution in mobile living. Timeless styling, high build quality, luxurious finishes, automated setup, and a patented design allows for a compacted form when towing or not in use, then - at the push of a button - the cabin rotates from the outer shell to reveal a covered patio that can be closed down for four seasons 'camping'. Not your normal caravan, and whilst totally mobile, the Romotow is also ideal as a more permanent dwelling, a beach house, tiny home or luxury escape on a larger property. Romotow also offer the T8 as shell only, ideally suited to promotional use with its built in covered patio and attention grabbing design.

To compile the list, TIME solicited nominations from TIME's editors and correspondents around the world, and through an online application process, paying special attention to growing fields—such as AI, green energy, and sustainability. Contenders were assessed on a number of key factors, including originality, efficacy, ambition, and impact. Of the new list, TIME's editors write: "The result is a list of 200 groundbreaking inventions (and 50 special mention inventions)—including the world's most powerful supercomputer, a game-changing entertainment venue, and a new shape—that are changing how we live, work, play, and think about what's possible."
