

If the idea of owning a cat appeals but the cost and the hassle don't, a yachtshare opportunity could be just what you need – and it can also get you a sought-after Bali Catsmart. Dream Fractional eliminates many of the barriers for would-be yacht owners with a much lower buy-in cost. Owners reap the benefit of the world recognised expertise of Dream Yacht Global in yacht sales, boat ownership programs and over 40 worldwide yacht charter destinations, and the team's local knowledge and experience with Queensland Yacht Charter's, Dream Yacht Sales and Bali Catamarans.

The Bali Catsmart yachtshare opportunity in the Whitsundays is an exclusive offer of up to 8 shares in the owner's version of the Bali Catsmart, which provides unprecedented living space with a dedicated private owner's suite, complete with spacious ensuite, plus two further guest cabins with shared ensuite for friends and family.

The Catsmart comes prepared for long distance cruising, with an ergonomic fully-equipped Galley, a Code Zero sail, a watermaker and a full-spec air-conditioning system for your comfort.

The Catsmart delivers all the unique features of the Bali catamaran range. There's a maxi saloon lounge for 10 guests and a large chart table facing the sea, both of which are models of ergonomics and comfort. The ergonomically designed galley is located forward, meaning it sits central between the saloon and the forward cockpit, which means easy service either for interior dining or for alfresco meals and snacks in the forward cockpit and sunbathing area through the galley's forward window.

A key feature of Bali cats is the large tilt door that lifts the aft bulkhead and seamlessly connects the back of the boat to the front. This results in exceptional light, ventilation and clear open space without equal, creating more than 66 square metres of usable living space.

The aft cockpit offers a place to relax, as well as providing stowage for all your gear, and the helm stations are accessible from both sides of the boat so the helmsman does not have to be alone. The open space design means there are plenty of areas to choose from so you and your guests can be together or can find privacy.

Thanks to a wider sail plan and a boom lowered to the level of the coach roof for improved accessibility, the Catsmart is an extremely easy-to-handle boat that offers superb sailing pleasure. With twin helms aft on port and starboard, handling is effortless.

Dream Yacht Australia's Managing Director Mr Christophe Vanek – who has acquired over 30 years of experience in professional yacht racing including three America's Cup challenges, Maxi Multihull racing on the international circuit, 15 Sydney to Hobarts, and who is a qualified RYA Yachtmaster Offshore – offers share owners the unique opportunity of coaching and tuition with the purchase of a share in the Bali Catsmart. bali-catamarans.com.au
