

Media Release

Biortica Agrimed continues Team growth

Biortica is pleased to announce the appointment of Shane Branigan to the role of Chief Financial Officer.

Hitting the ground running, Shane has already commenced his role the same day his appointment is announced.

"I'm a great believer in always taking a proactive approach," he said, "and am highly excited to be joining Biortica Agrimed. The company dynamic is contagious, and I do look forward to making a solid contribution."

"Shane has big boots to fill, taking over from Matt Turner our previous CFO and company co-founder," said Biortica's CEO, Tom Varga, "With this transition Biortica is reaffirming our commitment to Apollo Green, a leading provider of genetics, and our international growth strategy. Matt remains with Biortica in an expanded role, investing his time to build our International Division with a specific focus on genetics, import and global expansion in the newly created role of Chief Global Officer. This is an exciting new chapter for the business"

An RMIT graduate in Business Administration (Exec.), Shane brings 27+ years' experience to the role, working in senior finance roles with global and ASX listed companies. In addition to depth of financial experience, Shane brings, International and NASDAQ experience to Biortica

"It's been great to be part of the building of this leading business from scratch, and today we are a global company," said Matt Turner former CFO. "I look forward to working with Shane both during the transition and moving forward as we both contributing to the next phase of Biortica's growth."

"A company's greatest assets are its' Team." said Tom Varga, "We continue to build a top-class Team and so the Company and our Shareholders continue to enjoy first-class outcomes. Watch this space as there is more great talent to be announced."

Biortica Agrimed Ltd

Award winning, Biortica Agrimed Ltd is Australia's largest fully vertically integrated commercial grower of medicinal plants. Our B2B operations are seamlessly integrated from plant genetics through to supply of medicinal plants in commercial quantities. We employ glasshouse-based horticulture, to both, protect our valuable medicinal crops, and equally to minimise our environmental impact, thereby protecting the planet. Our goal is to significantly improve human health outcomes by supplying high quality agricultural medicinal plants, at scale, to uniform high quality standards year-round.
